To The Director of Community Projects,
M A D R A S.

S i r,

*p. 23
infra*

I am herewith submitting a copy of a memorial addressed to The Collector of South Kanara by the residents of Mundkur and surrounding villages. We were not aware in the beginning that there was a proposal of a Primary Health Centre in the Community Projects and so the claims of our place could not be pressed in time though it was earmarked for one long ago.

Considered from the point of view of the central location of this place in the whole community project of our District, from the view of the unhealthiness of the surrounding area, from the point of immediate necessity of medical relief and also from a long range view of things, our place comes an easy first in the matter of the location of the Primary Health Centre. Many difficult labour cases for want of competent and timely medical aid have collapsed. Hence an in-patient hospital is quite essential here. It is the unlevelled area that should be given top priority in the matter of any development plan.

Hence I pray that you will be pleased to kindly instruct the District Medical Officer, South Kanara, Bangalore, to visit this place early and re-investigate the relative merits of places and submit fresh proposals in the light of representations made. Yours faithfully
Mr. Shivanna Shetty, President Grama Seva Sangha

The Collector of South Kanara,
 Chairman, Community Project Area,
 South Kanara District
 MANGALORE.

PETITION OF THE VILLAGERS OF MUNDKOO
 &
 THE SURROUNDING VILLAGES.

Respected Sir,

Being aggrieved by a most unfortunate instance of singular injustice, in summarily rejecting without proper investigation and a correct appreciation of facts, about our request for the location of the Primary Health Centre at the centrally situated village of Mundkoo, we, the residents of Mundkoo and the surrounding villages of Mulladka, Inna, Balkunje, Karnire, Kollur, Ulepadi, Elinje, Aikala, Kavathar (of Mangalore Taluk) and Kallamundkoo, Paladka, Kadandale, Bola, Kedinje, Nandalike, Belman, Santhur (of Karkala Taluk) which are all within a radius of about five miles of Mundkoo, beg to state that a dispassionate reconsideration, in the light of the data furnished, of our representation for the Primary Health Centre may be thoroughly reinvestigated by the District Medical Officer and the Centre may kindly be located here. Many of the villages mentioned above are no better than Malnad areas.

Ours is an extensive rice cultivating area which plays an important role in supplying rice to the population of a greater part of Mangalore Taluk and this alone should be a generous gesture for the location of the Health Centre in our area, in as much as if our cultivators are healthy we will produce still more rice. Though we pay an assessment of about Rs. 40,000/- and there is a population of well over 30,000 constituting about 5,000 families we have not any outpatient or inpatient medical aid within a radius of about five miles either private or Government.

It is not beyond the knowledge of the Collector, the District Medical Officer, and the Rural Welfare Officer, South Kanara, that the Firka Development Committee has strongly recommended for the location of a Primary Health Centre at Mundkoo. Yet, in assessing the relative merits of places for the location of the Health Centre now, it passes beyond our comprehension how this considered opinion could now be flouted; and how an elevated and comparatively healthy area like Bajpe within easy reach of Mangalore, the District Head-quarters, could be selected, as it is only ten miles from Mangalore and thus easily accessible to the Wenlock Hospital, Lady Goschen Hospital, Kankanady Hospital, Leprosy Hospital, and the Mudushedde Tuberculosis Sanatorium. Moreover there is a rural dispensary in Bajpe and other qualified medical practitioners in and around that area, not to speak of the services easily available to Bajpe in about half an hour of the specialists and general medical practitioners and the Nursing Houses of Mangalore Town.

Mundkoo is a compact unit having a population of more than 5,000 consisting of about 1,000 families, which is by itself a qualification for the location of the Primary Health Centre in as much as it can be easily formed into a Development block. Besides, it has facilities to develop water works, watering facilities, residential accommodation, shopping centre, etc. It can easily be further developed. Only a rickety child requires medicine and nourishment to develop its body, and not a developed child. So also, Mundkoo which is undeveloped requires a Primary Health Centre to develop further. The main and the only intention of the Community Project is to develop undeveloped areas so that the Community in real needs may be benefited. It is against principles of bare elementary justice, and sound administration, to select already developed areas like Bajpe. On the other hand the common populace will be gratified and immensely be pleased if areas like Mundkoo and its Malnad like surroundings are fully developed, and thus demonstrate to the Community at large the real intentions and the usefulness of Project ideas.

We learn that the argument put forward is only the temporary inconvenience that there is one Sankalkaria Ferry between Mundkoor and Kinnigoli. Efforts are already afoot to have this bridged very early; because a combined bridge and dam with shutters to regulate water in the rainy season is a necessity to supply water to the Palimar dam and the extensive cultivating area. Till the Ferry is bridged, and as a temporary measure, the mobile Van may be kept in a shed on the South side of the ferry which is only about two furlongs from the proposed site for the location of the Primary Health Centre in this area. The site is in a central place, and about 20 acres in extent, almost level Government land. There are plenty of stones very near the site useful for building purposes, and hence the transport charges are almost nil. Besides, the people are willing to offer voluntary services for manual labour for building work; and a good deal of timber will be got gratis.

-Considered well from the long range view, of things and taking into kind consideration the whole Project area as a unit of development, it will be seen that this is the most central place being midway between Mangalore, Udipi and Karkala.

We, therefore, pray that this matter may be again kept before the advisory committee for reconsideration in its next meeting and the execution of the work of Health Centre may kindly be kept pending till then.

Correspondence on this subject may be addressed to Sri M. Shivanna Shetty, President, Grama Seva Sangha, Mundkoor, POST MUNDKOOR, (South Kanara District).

Yours faithfully,

M. Shivanna Shetty

PLANNING COMMISSION - Community Projects - South Kanara
Community Project Area - Opening of a primary Health Centre
at Mundkur - petition from the villagers of Mundkur -
report.

13 ante - Ref: Govt.Memo.No.6217 Public (C.P)II/52-1 dated 29-11-52.

....

The Mandi Centre is the centre of activity for the entire block and is intended to serve as a nucleus for the Block. Having these points in view the Project Advisory Committee has selected Bajpe as the Mandi Centre for Block I. The Primary Health Centre has to be located at the Mandi Centre. Provision has however been made for stationing a maternity assistant at Mundkur.

2. As stated in the petition, there is need for medical aid for Mundkur but it is not a reason for shifting the Mandi Centre or to detach the Primary Centre from the Mandi Centre. Though there is no provision under the Project to have another dispensary, one can be started at Mundkur in case the people are prepared to contribute liberally. As suggested by the Collector, the matter will be placed before the Project Advisory Committee which meets on 22-12-1952.

PUBLIC (S. P.) DEPARTMENT PLANNING COMMISSION - Community Project - South Kanara
MADRAS Community Project area - opening of a hospital at Mundkur -
Report - Submitted.

.....

fr. 3-6 ante
p. 13 ante
p. 21 ante
The villagers of Mundkur and the surrounding villages lying in the first block have made a representation for the location of the Primary Health Centre at Mundkur. A copy of their petition was also submitted to Government and the Government called for a report in the matter in Government Memorandum No. 6217 Public (C.P.II)/52-1 dated 29-11-52. In reply to it, it was reported in this office Ref.C.No.203/52 dated 20-11-52, that Bajpe had already been selected as the Mandi Centre for Block I having regard to its situation and its suitability as a marketing centre for the block and that it was not possible to detach the primary health centre from Bajpe and locate it at Mundkur. It was also reported that Mundkur and the surrounding villages were lacking in medical facilities and that there was a real need for starting a Hospital at Mundkur, though that was not a sufficient reason for detaching the primary centre from the Mandi Centre.

2. The petition from the villagers was placed before the Project Advisory Committee which met on 22-12-52. The committee was of the view, that while it was not possible to snift the primary health centre to Mundkur there is a real case for starting a hospital at Mundkur to serve the needs of Mundkur and the surrounding villages and that the Government be ad ressed in the matter.

fr. 25-31 infra
3. There is no provision for starting a hospital other than at the block centres and the secondary centre under the Community Project. The villagers have presented a petition at the time of the meeting stating that they are prepared to bear their share of the non-recurring expenditure. The petition is enclosed for favour of reference. I therefore recommend that the Government in the Public Health Department may be requested to take up the question of opening a primary centre in Mundkur as early as possible.

S i r

*Presented
dmt.
the
meeting
10/* From the Agenda kept for the advisory committee meeting to be held on 22-12-52, it is seen that under Item No.7 the question of the location of the Primary Health Centre at Mundkur is kept for consideration. When presenting the stay petition d.5-11-52, it was represented that opening of the centre at Bajpe may kindly be deferred. Yet, it is seen from the Note that the hospital has been hurriedly and temporarily opened from 17-11-52, while all other activities are in abeyance.

It is also seen from the Note that the Primary Centre cannot be separated from the Mandi Centre, that it is intended for the entire block, and also justly conceded that there is real need of medical aid in Mundkur and surrounding villages.

If the Primary Centre cannot be separated from the Mandi Centre, we respectfully submit that the Mandi Centre itself may be shifted to Mundkur as it is an ideal place for all activities and automatically the question of Primary Centre is solved.

In any scheme of development water is of prime importance. Bajpe is a dry, hilly place where there is acute water scarcity for several months, whereas in Mundkur it is in plenty throughout the year. Hence all the varied activities of the Project Scheme such as Nurseries, Model Farms, fishing activities, agriculture, arts, crafts, health measures, animal husbandry, irrigation, etc., could be easily demonstrated throughout the year and land also easily had and thus an

exemplary Mandi Centre planned and developed in the central place of the whole project Areas and the district as well.

Our respected Collector and Chairman, in his speech at Sitanadi Cattle Fair the other day, has said that the chief object of the Community Project Scheme was to increase food production and improvement of live-stock (vide the Mail d.12-12-52). Such being the case Mundkur and the surrounding area which is known as the granary of Mangalore Taluk deserves further development in every respect to give incentive for producing still more food and improve live-stock. ^{More than a 1000} ~~Hundreds~~ of acres of wet land could immediately be improved and thousands of muras of rice could be produced by second ~~and~~ and third crop, if only the Project Department would take the trouble to visit Mundkur and discuss the question with the agriculturists. It is an irony of fate that proposals were made without consulting the people and without knowing the actual facts and the topography of the District.

As the basic estimates are capable of adjustment and revision, a little adjustment in irrigation and communications so as to bridge Sankalkaria stream will improve the irrigational needs, give direct access to Udipi and Karkal by shortening the distance and open the interior villages of the Mangalore, Udipi and Karkal Taluks for marketing.

The mere fact that no doctor has settled in Mundkur shows the poverty and helplessness of the people roundabout in maintaining a doctor. It is rather a surprise to note from the Note when the people have no notes to give, asking their contribution both for non-recurring and even for recurring expenditure! In no scheme of development it is asked and it looks as if this is a threat and challenge to poor people for putting forward their just claim. By this threat the intention of the Community Project Scheme is thus frustrated and it looks as if the intention is only to give medical aid

(5) 2/29

where it is easily available in plenty and rich people can manipulate things for their selfish ends as is now widely talked about throughout the district. This may kindly be sent for publication in the "Kurukshetra" so that the attention of the Government and our exalted Prime Minister may be pointedly drawn. We will not hesitate to give our mite for non-recurring expenditure and would be content with a Primary Centre of six beds as per the Scheme.

We venture also to question whether the question of recurring expenditure is put to Mundkur people only for pressing their claim, or, whether it is a principle for all the works of the Project Department to be done in all places.

It is simply preposterous to think that the Primary Centre of a few beds at Bajpe will serve the entire area covering about 100 villages of about 400 square miles. An out-patient hospital will cater only within an area of about four miles. Bajpe, Surathkal, Gurpur, etc. being closely connected with Mangalore where there are hundreds of beds available in the several hospitals and nearly 100 doctors (60 allopathic and 40 ayurvedic) also available in that area that area is well served with medical aid, whereas the portion of the area to the north of Bajpe has only one ill-equipped ~~Mulki~~ Mulky local fund dispensary and three allopathic doctors and 2 ayurvedic practitioners in the whole area of about 50 villages and a lakh of population. These people have also a "right to live" as stated in the Scheme. Extension service of every department could easily be given to Bajpe, Gurpur and Surathkal from Mangalore where every facility exists, being the District Headquarters; and thus the Mandi Centre could be conveniently located at Mundkur. Since Karkal is to be the head-quarters of the Project Area activities can be easily supervised from there.

This representation may kindly be placed before the

(2) 27-31

meeting on 22-12-1952 and it is hoped that justice will be done by shifting the Mandi Centre itself to Mundkur and develop the area and demonstrate to the Community at large how backward and undeveloped areas could be developed and the good intentions of the sponsors of the Scheme realised. This will stimulate people of other backward areas in the district to follow the example of Mundkur as example is better than precept.

Yours faithfully,

Mr. Shivanna Shetty

President, Grama Sevak Sangh, Mundkur.

MUNDKUR, S. K.,

19th December, 1952.

The Collector and Chairman,
Project Advisory Committee,
South Kanara, M A N G A L O R E.

S i r ,

63319

From the Agenda kept for the advisory committee meeting to be held on 22-12-52; it is seen that under Item No.7 the question of the location of the Primary Health Centre ~~is~~ at Mundkur is kept for consideration. When presenting the stay petition d.5-11-52, it was represented that opening of the centre at Bajpe may kindly be deferred. Yet, it is seen from the Note that the hospital has been hurriedly and temporarily opened from 17-11-52, while all other activities are in abeyance.

2 It is also seen from the Note that the Primary Centre cannot be separated from the Mandi Centre, that it is intended for the entire block,, and also justly conceded that there is real need of medical aid in Mundkur and surrounding villages.

3 If the Primary Centre cannot be separated from the Mandi Centre, we respectfully submit that the Mandi Centre itself may be shifted to Mundkur as it is an ideal place for all activities and automatically the question of Primary Centre is solved.

4 In any scheme of development water is of prime importance. Bajpe is a dry, hilly place where there is acute water scarcity for several months, whereas in Mundkur it is in plenty throughout the year. Hence all the varied activities of the Project Scheme such as Nurseries, Model Farms, fishing activities, agriculture, arts, crafts, health measures, animal husbandry, irrigation, etc., could be easily demonstrated throughout the year and land also easily had and thus an

exemplary Mandi Centre planned and developed in the central place of the whole project Areas and the district as well.

Our respected Collector and Chairman, in his speech at Sitanadi Cattle Fair the other day, has said that the chief object of the Community Project Scheme was to increase food production and improvement of live-stock (vide the Mail d.12-12-52). Such being the case Mundkur and the surrounding area which is known as the granary of Mangalore Taluk deserves further development in every respect to give incentive for producing still more food and improve live-stock. Hundreds of acres of wet land could immediately be improved and thousands of muras of rice could be produced by second and third crop, if only the Project Department would take the trouble to visit Mundkur and discuss the question with the agriculturists. It is an irony of fate that proposals were made without consulting the people and without knowing the actual facts and the topography of the District.

As the basic estimates are capable of adjustment and revision, a little adjustment in irrigation and communications so as to bridge Sankalkaria stream will improve the irrigational needs, give direct access to Udupi and Karkal by shortening the distance and open the interior villages of the Mangalore, Udupi and Karkal Taluks for marketing.

The mere fact that no doctor has settled in Mundkur shows the poverty and helplessness of the people roundabout in maintaining a doctor. It is rather a surprise to note from the Note when the people have no notes to give, asking their contribution both for non-recurring and even for recurring expenditure! In no scheme of development it is asked and it looks as if this is a threat and challenge to poor people for putting forward their just claim. By this threat the intention of the Community Project Scheme is thus frustrated and it looks as if the intention is only to give medical aid where it is easily available in plenty and rich people can manipulate things for their selfish ends as is

The Director of Medical Services,
Madras.6. &
The Dt.Medical Officer, South Kanara.

Sir,

Sub: MEDICAL INSTITUTIONS- South Kanara Dt.Board- opening
of a Regular Dispensary at Mundkur - remarks-offering
of

Ref: Govt.memorandum No.4458-L-53-1 Health dated 17th
February 1953.

P b 2 antw

The request of the President, Panchayat Board, Mundkur
made in his letter referred to in the above Government Memorandum
relates to the opening of a Local Fund Dispensary at Mundkur
out of the provision of the L.F.Dispensary, Moodabidri which would
be rendered superfluous in the event of opening of a primary
Health Centre there under the Community Project Scheme. The
Community Project Executive Officer, Mangalore now informs that
there is no proposal of opening a Primary Centre at Moodabidri
and that the only proposal is to meet the deficit in the existing
provision for "diet of patients", 'cost of medicines' and
"contingencies" of the L.F.Dispensary, Moodabidri. In view of
the above, I have to inform the Government that the question of
opening a Regular L.F.Dispensary at Mundkur out of the provision
of the L.F.Dispensary, Moodabidri does not arise.

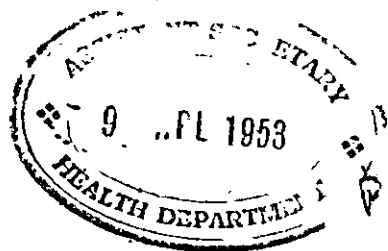

For President.

hys/4-3

Sub: Medical Institutions - South Kanara District -
Opening of a Local Fund Dispensary at Mundkur
remarks - furnished.

Ref: Letter No.Roc.A.4-318-53 dated 28-2-1953 from the
President, District Board, South Kanara.

Forwarded with reference to the Government Memo No.4458 L/53
-1 Health dated 17-2-1953.

20329 p.b.2 ant

2. As the proposal to convert the existing Local Fund
Dispensary at Mundkur into a Primary Centre under the Community
Projects scheme has not eventually materialised, there is no
question of utilising the savings accruing on this account
towards the establishment of a Local Fund Dispensary at Mundkur
as requested by the President, Mundkur Panchayat Board, in his
letter No.Ref.62 dated 19-1-1953.

p 54 ant

3. It is reported that there is an Ayurvedic Rural Dis-
pensary at Palimar, 5 miles from Mundkur. But Mundkur and its
surroundings form practically an island during the rainy season
not accessible from any side for want of bridges for the rivers.
It is therefore considered that the demand of the villagers for
a Dispensary is quite legitimate.

4. The District Board cannot at present undertake to open
even a Rural Dispensary at Mundkur, in view of the very unsatis-
factory condition of the finances of the Board. A reference
is in this connection invited to the orders in G.O.No.Ms.340
Local Administration dated 20-2-1953 in which the Government
have asked this District Board not to undertake new commitment

67

-2-

on account of the opening of new dispensaries or by expanding the activities of the existing Medical Institutions. In the circumstances, the question of opening a dispensary at Mundkur by the South Kanara District Board will have to be deferred for the present.

Panchayat, Mudkur,
S. Kanara Dist. Sangam
Mundkur, S. K.
S/C.
The President of the
Sangam

Director, Community Projects:

Moodabidri (South Kanara) has been selected as a mandi centre for the second blocks. There is a L.F. dispensary there and this will be converted into a primary health centre. The savings effected on this account by the District Board may be utilised by them for opening a regular dispensary at Mundkur which is an important panchayat ^{village} in the project area Mangalore taluk.

2. Since a primary health centre will be opened at Bajpe, the rural dispensary there will have to be closed. The rural medical practitioner may be employed at the primary health centre at this place.

Minister (Health)

Public (C.P.II) Deptt.

Para 1 above:- The villagers of Mundkur have come forward to bear the non-recurring expenditure towards the opening of a hospital at ~~that~~ that place and the Project Advisory Committee has supported the request. The Health deptt. is being requested to take necessary action. That deptt. may be requested to ~~also~~ examine the above suggestion also in consultation with the Local Administration Deptt.

Para 2 above:- The rural medical practitioner at Bajpe has already subtd. a petition in this behalf to the Minister for Health. A copy of the petition is in the L.F. The remarks called for from the P.E.G., Mangalore, has not so far been recd. He is being reminded in that file.

2. No. 6217/52. Sub:- Community Projects - South Kanara Community Project Area - Opening of a Primary Health centre at Mundkur.

Pr. 230 f. = Ref:- From the P. E. G. Mangalore, No. L. Dis. 203/52, dated 7-1-53.

Pr. 1-5 c. f. { The President, Grama Seva Sangha, Mundkur, has forwarded a copy of the petition submitted by the villagers of Mundkur and the surrounding villagers in the South Kanara C.P. Area. The main request in the petition is to locate the Primary Health centre at Mundkur as against Bappe. The ~~main~~ reasons put forward for this are (1) Bappe is within easy reach of Mangalore, the D.T. headquarters; and (2) There is a rural dispensary and other qualified medical practitioners in Bappe and (3) that the above facilities are lacking in Mundkur, but it is situated at a central place being midway between Mangalore, Udipi and Karkala.

Pr. 21 c. f. { 2. In his letter dated 5-12-52, the P. E. G. Mangalore, has stated that the Project Advisory Committee has selected Bappi as the Mandi centre for Block I having in view that the Mandi centre should be the centre of activity for the entire block and ^(that it) should serve as a nucleus for the block. The Primary Health centre has therefore been located at Bappi. He has however stated that provision has been made for stationing a maternity assistant at Mundkur. The P. E. G. has also stated that there is ^(real) need for medical aid at Mundkur, but that is not ^(reason) sufficient for detaching the Primary centre at Mandi Centre, viz. Bappi.

* Pr. 21 c. f. { 3. At the instance of the Colr. of South Kanara the P. E. G. placed the matter again before the meeting of the Project Advisory Committee held on 22-12-52. He says that the P.A.C. is of the opinion that while it is not possible to shift the Primary Health centre to Mundkur, there is a real need case for starting a hospital at Mundkur.

Mundkur

2/15

Mundkur to serve the needs of that and the surrounding villages and that the govt. in the Health deptt. may be addressed in the matter. The villagers represented by Sri M. Shivanna Shetty, President, Grama Seva Sangh, Mundkur, presented ^{mother} petition at the time of the meeting of the P. A. C. A copy of the petition is on pp. 25-31 c.f.

pp. 23 c.f.

4. It is stated in the petition that if the Primary centre cannot be separated from the Mandi Centre, the Mandi centre itself may be shifted to Mundkur as it is an ideal place for all activities; that water is available in large quantities as against Bappe, ~~rather~~ where there is acute water scarcity for several months and that ~~Mundkur~~ Mundkur and the surrounding villages which is known as the granary of Mangalore taluk deserves further development in every respect to give incentive for producing still more food and improve live stock. It is also stated that the petitioners are prepared to contribute the non-recurring expenditure and would be content with a Primary centre of six beds.

pp. 25-31 c.f.

5. It is submitted that as Bappe has already been selected as the Mandi centre and ^{for} the location of a Primary Health Centre there, by the Project Advisory Committee, we cannot ^{it seems} interfere in the matter of shifting the Primary Health Centre from Bappe to Mundkur. ~~As requires~~ The view of the Project Advisory Committee, supported by the P. E. C., Mangalore, to open a hospital at Mundkur may be remitted to the Health deptt. and that deptt. may be requested to take necessary action in the matter. For orders.

Orders of D. C. P. on p 2 ante.

In the file
of the 1st C. no.
5.1.53. The appen-
dix of Dr. Rangappa
in the 1st early
centre at Bajpe
had been in-
cluded. It was
in the Public P)
on 2.4.53
did not
12-4-53

Sri. M. Rangappa Kamath, a Rural
Medical Practitioner of Bajpe's protests against
the location of a Primary Health centre in
mainly on personal grounds - vide pp 1-9 CF.
in top file (cor. 10005/52). The following are
the reasons forwarded by him against the loca-
tion of the Health centre at Bajpe.

- (1) A Rural Medical Practitioner is not eligible
for gratuity, pension, or provident fund to
fall back upon his old age, hence ^{his position} he is seriously
affected.
- (2) The Govt have prohibited the opening of any
other Govt or Local Board Institution within a
radius of 5 miles of a rural dispensary;
- (3) he has made large commitments to settle
permanently in Bajpe and will gravely
affect the future education of ^{his} children
- (4) no extraordinary or exceptional circumstances
have suddenly arisen to justify the location
of a Primary Health Centre at Bajpe in
preference to any other place
- (5) If new and higher grade institutions are
started far away from Dist. Headquarters,
it will give better spacing of institutions / and
- (6) the location of a Primary Health Centre will
discourage medical men to settle in villages
and do rural medical and social work.

In this case the P.E.O. has stated that there
is nothing to be upgraded except the Doctor.

Attention is in this connection invited to
para 2 in the DMS's letter (Copy on p 21 CF. of Top file)
it seems that the requests of Dr. Rangappa
Kamath cannot be entertained. Orders to this
effect may issue in the Top file.

The point dealt with in this case is about
the opening of a hospital at Mundkur/
this point has been set out in the office
note on pp 1-2 ante & orders are requested

4/3/53

5/3/53

20/1/53

I believe under the C.P. scheme each area is to have three primary health centres. Where are the other two centres located? If they have not been started yet, cannot Mundkur's case be considered in that connection?

5/3/53

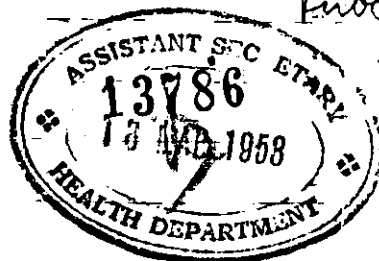

It is submitted that each Project Area would have 3 Primary Health centres or 2 Primary Health centres and one Secondary Health centre. In South Kanara Area a Health centre has already started functioning at Bajpe which is the Randi centre for Block I. It is proposed to open similar health centres at Kudubidri and Hebri, which have been selected as Randi centres for Blocks II and Block III respectively. The selection of these two places has not yet been finalised. ~~With reference to~~ the query of R. S. above, it is submitted that a Primary Health centre cannot be started at Mundkur. It is therefore submitted that Health Dept. may be requested to take necessary action for the location of a dispensary at Mundkur.

16/3/53

I agree. Health Dept. may see as proposed

p 64 cf

From the D.M.S. R. No. 19367-62-53 of 4-4-53

Please see the notes of the Public (C.P) Department from page 5 ante, the reply from the P.D.B. South Kanara and the endt. of the D.M.S., at pp. 64-66 c.f.

Public (C.P.) state that a primary Health centre cannot be started at Mundukur and that this department may take necessary action for the location of a dispensary at Mundukur. The Panchayat Board, Mundukur has requested the opening of a L.F. dispensary at Mundkur out of the provision of the L.F. dispensary, Moodabidri which would be superfluous in the event of opening a primary Health centre there under ^{the} the minutes of (Health) in para 1 on p 4 ante may be noted the Community Project scheme. It will be seen from the letter of the P.D.B., South Kanara and the ^{end of the} D.M.S., that the proposal ^{for p.h. centre at Moodabidri} has not materialised and there is no question of utilising the savings accruing on this account towards the establishment of a L.F. dispensary at Mundkur.

In the circumstances stated in para 3 of his letter on page 66 c.f. the D.M.S. considers that the demand of the villagers for a dispensary at Mundkur is legitimate, ^{but the} ~~however~~

74

reports that the Dt. Board cannot undertake to open even a rural dispensary at Mundkur, in view of the very unsatisfactory condition of the finances of the Board and that recently the Govt. have asked the Dt. Board not to undertake any commitment on account of the opening of new dispensaries or by expanding the activities^{rites} of the existing medical institutions, and that the question of opening a dispensary at Mundkur ~~xxx in the circumstances~~ by the South Kanara Dt. Board will have to be deferred for the present.

It is for orders whether the suggestion of D.M.S. may be agreed to. The case may be circulated to M(Health) with reference to his minutes on page 1 ante. (para 1).

A

2. As regards the minutes of M(Health) in para 2 on page 1 ante, Public (C.P.) department has taken the necessary action and they seemed to have issued orders that the request of Dr. Rangappa Kamath cannot be entertained.

Y
